The Story of Jacuzzi®

Our world renowned brand encompasses years of cutting edge design and technology and since 1956, the name has established itself as both innovator and inventor. The Jacuzzi® story is a warming tale of sheer determination and hard work. Such focus, dedication and drive were fundamentally cultivated with family at the heart. With 7 brothers, 6 sisters, 2 world wars and emigration, the founding Jacuzzi® family spent their lifetime exploring new ideas and experimenting with product designs to build a business.

The seven Jacuzzi® brothers emigrated to California from Italy. The brothers made great strides in aviation by inventing and flying the first enclosed cabin monoplane. In the 1920's their engineering skill and interest in hydraulics and the thermodynamics of fLuids led them from the field of aviation to agriculture. Incorporating their hydraulic insight, the Jacuzzi® family later made notable advancements in the agricultural pump industry.

Today the engineering and technological advancements in hydrotherapy and jetted baths continue to flourish as new additions and ideas appear on Jacuzzi® whirlpool baths and hot tubs. We continue to anticipate your needs effectively by carrying on theJacuzzi® tradition of style and ingenuity. In addition to being recognised as the world's largest selling brand of jetted whirlpool baths and hot tubs, Jacuzzi® has over 250 worldwide patents for advancements in pump systems, jet technology, air control and product design. In 1943 KennethJacuzzi®developed rheumatic fever, which left him with juvenile rheumatoid arthritis. Recognising that monthly hydrotherapy sessions at hospital eased his son's symptoms, lead Candido Jacuzzi®, the youngest of the 7 brothers, to develop a new hydrotherapy pump in 1956, that would give Kenneth more regular treatment at home. From that application, a small niche business developed. The family sold their portable pump, named J-300®, to hospitals and schools. The pump was later designed alongside the bath and new exclusive jet technology took the pump idea to a new level. A mix of 50% air and 50% water, turning through these special jets provided an experience like never before.

By the 1970's, Candido's grandson Roy Jacuzzi® developed larger bathing units with built-in heating and fi Itration systems were introduced to accommodate groups of bathers, thus creating the first hot tub.

Jacuzzi® brand. More than just a name.

Over 50 years of invention and innovation have taught us to always keep moving. We continuously work towards uncovering the next technological discovery that will enhance the sensory experience of a Jacuzzi® hot tub. You know you're always getting the best hydromassage possible.

Jacuzzi[®] presents Sasha: three-in-one wellness

A new way of enjoying wellness: a sauna, an emotional shower and a hammam in just one space. A new concept born from the encounter of skill and technology by Jacuzzi® with the creativity and experience of the architect and designer Alberto Apostoli.

sasha

sasha 2.0

3 different models to meet any space, style or functionality requirement. Sasha, Sasha 2.0 and Sasha-Mi: three very refined, versatile, modular models that can be installed in any space, from the largest to the smallest, from a wellness centre to a hotel leisure area, to the home. Three versions designed to offer utmost flexibility and modularity, lots of features and functions, precious details and the effectiveness of the best Jacuzzi® treatments.

UDISIIS QUALITY FOR PLUMBING

R

The head and heart of Valsir are in Vestone, in Valsabbia, on the route which leads from Lake Garda to the Brenta Dolomites.

It is here that the strategies of this globally oriented company are defined, involving business agreements and joint-ventures in Europe, Asia and Africa.

Economic growth, technological development, pursuit of quality, on-going research, project design activities, the strong presence in European markets and in the rest of the world are the elements that have guided and still guide Valsir policies today.

Valsir offers the market advanced systems for waste, drainage and water supply

GEBERIT

Since the day it all began in 1874 in Switzerland, we have been defined by our experiences. Geberit has been among the pioneers of the industry and is still setting trends with comprehensive system solutions. With approximately 6,200 employees around the world and offices in more than 41 countries, Geberit stands for innovation, durability and ecological efficiency.

GEBERIT AQUACLEAN

Aquaclean 8000 Plus 180.100.11.1

Geberit AquaClean 8000plus leaves nothing to be desired and offers many extra pampering functions in addition to the water spray. As soon as the user sits on the WC, the automatic odour extraction function switches on, keeping the air in the bathroom fresh. The spray temperature and intensity can be adjusted to suit personal preferences. While the pulsating massage function has an invigorating effect and the soft lady wash guarantees gentle personal hygiene for ladies. After the spray has finished, the integrated warm-air dryer dries you off in comfort. All functions can be individually adjusted and up to four user profiles can be saved.

Geberit AquaClean Sela cleans you with a gentle, airy water spray at body temperature. The intensity of the water spray can be adjusted to one of five levels, while the oscillation ensures a pleasant cleaning experience. Thanks to the integrated user identification function, the water starts heating automatically as soon as you approach the WC. The ceramic unit has a special coating making it dirt-repellant, resulting in effective self-cleaning. The Geberit AquaClean Sela seat has extremely comfortable ergonomics and its seat cover is easy and quick to remove, making cleaning a lot easier. Just like all Geberit AquaClean models, this product also complies with European Ecodesign requirements and, thanks to its energy-saving function, consumes a minimal amount of energy even in standby mode.

Geberit AquaClean 4000 offers all the basic functions you need from a WC with integrated shower function. The easily installed WC enhancement solution is compatible with most WC models. The practical enhancement solution washes you clean with a gentle and airy water spray at body temperature and at the intensity you choose. The control panel is easily accessible and self-explanatory. And as with all Geberit AquaClean models, the Geberit AquaClean 4000 has a soft-closing lid.

GEBERIT MONOLITH WC

A truly good design makes a strong impression not only with its shape but also with its functions, materials and technology behind it. Geberit Monolith WC module conceals all the necessary technology behind a simple design concept which is quick to install and offers plenty of scope for creativity.

Wall-hung WC ceramics and AquaClean Sela wall-hung WC 131-026-XX-1 - 4.5L/3L 131-021-XX-1 - 6L/3L

GEBERIT MONOLITH PURO

The Geberit Monolith Puro is a simple yet impressive design that includes all benefits expected from a Geberit product. All the working parts including tank and piping connections are hidden inside a sleek metal-and-glass housing. Its dual flush option saves water and the Monolith Puro can be paired with a variety of floor standing WC ceramics.

NOBILIA®

The Best Technology for Water

Often when using a thermostatic mixer for the shower its body reaches very high temperatures. This cannot happen with the "Thice" thermostatic mixer by Nobili Rubinetterie as it is made with "Icebody" technology. Thanks to this innovation, "Thice" is able to isolate the external surface of the mixer body so it is always cold - even when the water temperature is very high - because it is fitted with an insulating plastic internal core of first-rate efficiency. This feature makes it particularly recommended in the presence of children, and more generally in situations in which accidental contact with the thermostatic body may take place, which would cause bothersome burns. The new "Thice" collection with chrome finish is available starting today in three versions: external thermostatic for the shower, external shower column, external shower column with telescopic rail. With this innovation Nobili Rubinetterie is continuing its search for excellence by offering solutions marked by high technological content and designed to offer comfort, efficiency and safe use.

Since early 1970s, the Meridian International Group, an Original Equipment Manufacturer located in Milwaukee, Wisconsin, has been producing faucets, valves, shower components and other machined products for some of the world's leading companies in the plumbing sector. In order to meet the increasing demands of the American market, Meridian International Group acquired Valvex, a European valve and faucet manufacturer founded in 1922.

GRAFF became the benchmark brand in the USA market by resisting the trend to cut-costs and focusing on quality, cutting-edge design. In 2010, to strengthen its market presence in Europe, GRAFF created a branch office in Florence, Italy. Today, GRAFF continues to grow, testing and developing cutting-edge, lu

Headquartered in Milwaukee, Wisconsin, USA, with locations throughout Europe, GRAFF is globally recognized for its trend-setting products and unique vision. Supported since 1922 by extensive plumbing and hardware manufacturing experience, GRAFF has positioned itself at the forefront of design creating designer-based collections for the luxury market.

Utilizing the latest manufacturing technology and thanks to a tradition of old-world craftsmanship, GRAFF's commitment to creating cutting-edge, premium-quality collections is evident in each and every product. GRAFF employs over 1000 dedicated professionals and has total control over the full production process, making it a truly vertically-integrated manufacturer.

GRAFF's parent company, Meridian International Group, is an ISO 9001 and ISO 14001 certified company, comprised of several business units. Meridian strategically combines a strong European OEM faucet and valve production history with over 30 years of American excellence in OEM machined parts.

Meridian's prestigious customer portfolio includes many global plumbing companies as well as the number one American manufacturer of motorcycles.

M - series

Modularity Features

• A cut-off valve can open and close one outlet independently from any other

• Each diverter can open and close only one of the outlets at time among the ones it controls

• Several diverters can be combined together one upon the other

• Apart from the 3-outlet diverter, all M-series valves have a pass-through function that allows the water to flow continuously from one valve to the next

• The M-series diverters also have volume control and on and off functions for each one of their outlets. For this reason they don't need an additional cut-off valve to operate

• The M-series allows to control up to 7 outlets with only 4 handles

Installation Features

• The M-Series valves have special ports that allow each valve to stack one upon the other. By creating a unique block, the M-series combination is extremely easy to install

• The 3-outlet diverter should always be mounted on top of the block

• The M-Series valves can be installed both vertically and horizontally

		Pressure (bar)

Bossini has been producing showers and accessories since 1960 with the awareness that even a simple daily act, like using the shower, can open the door to a whole world of values: functional, aesthetic, technical and human values. Quality, design, research and innovation are the founding principles of all Bossini's planning and production. Consequently the Company has garnered a prestigious role for itself in the international showcase - where Italian design has always been considered the ultimate of good taste and elegance - proposing a range of products that are innovative and meet the highest of quality standards. Thanks to its 50 years of experience, Bossini has succeeded in giving showers the added values of personality and character reflected by a highly evolved concept of "The Bathroom", intended not only as an intimate space that merits top quality in terms of aesthetics and function, but as a new theatre of home wellness.

With Bossini the shower turns into a truly emotional experience to be enjoyed every day.

SYNCRO-NEB 3 SPRAYS

100590

Syncro-Neb is a shower panel with rotary control that allows you to select three different jet modes, offering the pleasure of water in its most natural forms: the refreshing caress of rain, a comfortable waterfall jet or fresh twist a of a water spray. The Syncro shower head allows for single supply with ready mixed water that greatly simplifies installation and allows you to use the wall mounts already in place, making it even easier to restore the shower environment. SIZES 450 x 200 x H. 24mm

SYNCRO-RAIN 3 SPRAYS

100591

The shower head Syncro-Rain, an horizontal panel with a manual command which delivers three different sprays. Experience water in its natural form: as a wide rain shower, rain or concentrated in powerful waterfall. The Syncro shower head allows for single supply with ready mixed water that greatly simplifies installation and allows you to use the wall mounts already in place, making it even easier to restore the shower environment.
