# BLANCHINI®

ITALIAN **ART** DESIGN

# nicoline

*piccola sartoria italiana*

Nicoline is a company that, despite its international dimension, has maintained our “family” character. We have more than forty years of experience and passion behind us; over two generations of artisans have developed and handed down the secrets of their “sartorial skills” in making fine Italian sofas, chairs and beds. Although Nicoline has maintained its traditional way of making furniture, we have invested in new production technologies; this enables us to produce the finest top quality furniture while satisfying both the domestic and abroad markets.

Nicoline, founded in 1992 by Nicola Palasciano developed into an internationally well-known firm able to fulfill consumer demands. We like who we are; small but with a great reputation. We get more satisfaction from a properly stitched seam than a front-page headline. We like the way our staff is always enthusiastic, especially about creating a new product; the way they keep on smiling, even when they are working round the clock to finish a difficult job, watching them listen to music while they work. This very different – and very Italian – way of being a workman, artisan, tailor or manager is one of the reasons we excel at making sofas. Attention to details, quality of workmanship and a wide range of products, have always been our strengths.

Today Nicoline furniture exudes tradition, experience and passion by blending specific technical expertise, the know-how of an experienced team with an entrepreneurial approach in absolute harmony with the social, economic, and environmental changes of the era.

LATERALE  
DEPTH

An important model. The Astor is a corner sofa of large dimensions which preserves lightness and elegance. Original, sophisticated and at the same time discrete, Astor is definitely a sofa “out of the ordinary”. The solution of the cushion that softly accompanies the line of the armrest, up to merge with the sofa seat, is an interesting detail that distinguishes its design

LATERALE  
DEPTH

With a resolute character, this model looks almost suspended. The rigorous geometry is interrupted by diagonal lines at 45° of the side cushions.

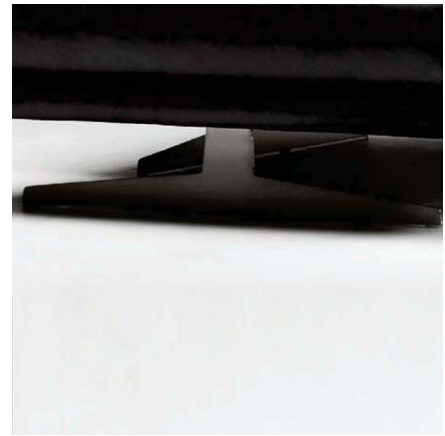

The Mykonos sofa expresses its perfection through the attention to details. A double stitching joins together the perforated and smooth leather. The particular legs are available in different finishes, and lumbar cushions give the Mykonos model grandeur and lightness, synthesis and elegance.

Very comfortable. Only two words to describe the model Blues. You just have to surrender to the enveloping warmth of its optional moving seats.

Refined but linear. Blues model stands out for its moving seats which “glide” allowing the user the most comfortable position with a simple movement, electric and manual.

The model shows an important armrest covered by a thin padding layer; and a shiny metal base. Available also with wooden feet.

Solid, practical, essential, stylish. Papillon model is rich in detail and with excellent finishing. The Papillon is a special sofa for the particular tailored seams performed on the armrests, seatback and seat. A “relax” model with soft and generous proportions. With a simple movement it offers a casual and informal conviviality.

# cattelan italia

CATTELAN ITALIA was founded in 1979 from an idea of Mr. Giorgio and Mrs. Silvia Cattelan. They started to introduce into the market small marble complements and table in different sizes for export markets.

In 1989, in order to face market needs, the collection improved with the offer of dining tables, chairs, bookcase sand other complements. They have worked all materials – wood, glass, metal, leather – with taste and style and a important attention to the comfort.

The house is the icon of loved belongings – says Mr. Giorgio Cattelan – is a word where everybody want to be closed to comfortable elements. The “beautiful” for me is above all “functionality”.
