Professional Performance for Professionals

In 1981, Fred Carl, Jr. drew the first concept for the Viking range at the wishes of his wife. Mrs. Carl wanted to install a heavy-duty range in her home kitchen, but with no suitable options on the market, her husband set out to create what she desired.

Today, Viking Range Corporation, the originator of professional performance for the home, is redefining commercial kitchen performance. After years of research, design, and innovation, Viking Range Corporation is pleased to introduce Viking Commercial, a full-circle endeavor in the evolution of the Viking range.

The Viking commercial kitchen includes island suites, ovens, ranges, broilers, griddles, French tops, hot tops, planchas, salamanders, cheesemelters, and refrigerated equipment stands - all utilizing the unique Viking modular design. Each unit is built-to-order and exemplifies the ultra-premium Viking standards and iconic Viking style.

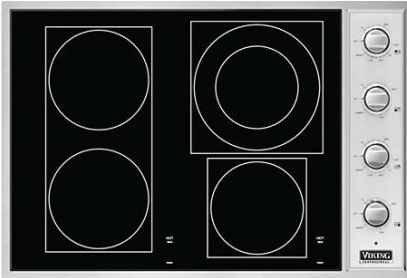

These heavy-duty Viking Commercial workhorses feature 30,000 Btu sealed top burners, extra-durable construction, and easy cleanability. This specialized product line is unrivaled in features, power and style, with limitless options, including exclusive color finishes. Viking Commercial has already received widespread acclaim. Only a few short months after its introduction, the Viking Commercial division received the prestigious National Restaurant Association (NRA) 2009 Kitchen Innovations Award.

This U.S.-designed and manufactured product line provides specialized high-end foodservice equipment and is sold through a network of exclusive foodservice equipment dealers. The Viking Commercial products division is headquartered in Southern California and the equipment is manufactured in one of four plants located at the Viking company headquarters in Greenwood, Mississippi.

Total 20.4 cu. ft. (578 liters)

FEATURES

Specialized Refrigeration Storage

- Two adjustable Humidity Zone™ Drawers with NEW soft-close slides
- Humidity can be set high for leafy greens or low for fruits and vegetables with skins
- NEW Two deli drawers with soft-close slides
- NEW Additional space for large pizza box storage
- Two in-the-door dairy compartments with covers
- Four Patented (three are adjustable) aluminum door bins securely store heavy items
- Adjustable door stops – 90, 110 and 120 degrees

Specialized Freezer Storage

- Full-extension main freezer compartment pulls out like a drawer for easy access to bulky frozen foods
- Opens quietly and easily, with ball-bearing rollers which glide on a steel track
- Positive self-closing feature ensures a good seal
- Upper freezer basket slides independently of main freezer compartment; ideal for fragile or frequently used items
- Adaptive defrost controls the timing of the defrost periods, instead of an electromechanical defrost timer
- Extends to 96 hours – improves food storage because the unit defrosts less often
- Factory-installed automatic ice maker features large-capacity ice bucket
- Door alarm sounds and glows to warn that fresh food door and/or freezer drawer have been ajar for three minutes, and that the temperature has risen above normal operating range

DIMENSION

PTDP151

FEATURES

Large Capacity

Show garbage who's boss with 3,000 pounds of crushing power for a family's weekly trash. 1.55 cubic-foot trash drawer allows random loading of bulky items.

Maximum Compacting Power

More power, less waste. In 35 seconds, our 3/4 HP motor. Crushes and holds up to 30 lbs. of compacted trash.

Digital Display

Programmable compaction cycles for automatic operation with LED display.

Bag Storage Compartment

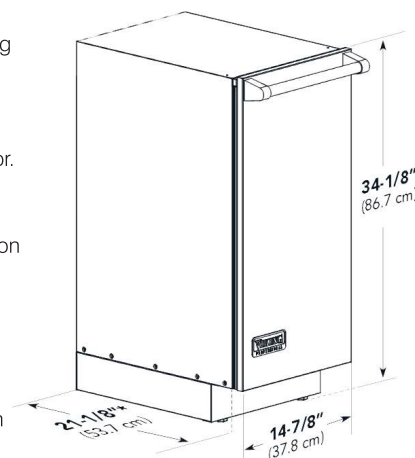

Integral bag storage compartment means bags are always within reach.

Odor Control System

Trash never smelled so good. Eliminate the odor of trash with our six month, auto advance, odor control with disc change indicator.

POWER

Electrical requirements: 5.0 amps, 1 20VAC/60 Hz; 6' (1.82 m) electrical cord 3 prong plug supplied with unit

VWUI5240GRSS

FEATURES

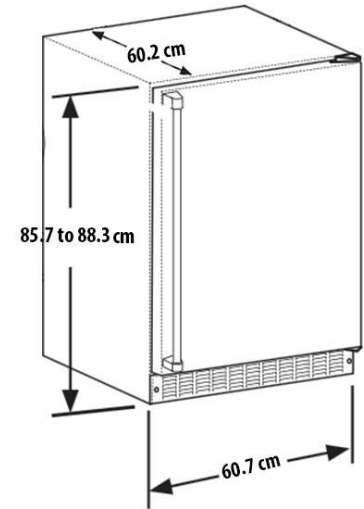

- Storage Capacity
- 24"W. model stores up to 40 bottles total
- Two independently monitored zones store wine collections at separate temperatures
- Integrated controls provide precise temperature management from 40°F to 65°F
- Two-stage, soft blue theatre-style LED lighting and sophisticated midnight black interior
- Tinted, UV-resistant dual pane glass door protects wine from damaging ultra-violet light
- Audible and visual alarms signal when door is left ajar to protect food integrity and energy use
- Vacation/Sabbath mode conserves energy during times when the unit is not in use and complies with Star-K requirements
- Height adjustment up to 1" with leveling legs

FINISH AND DESIGN OPTIONS

- Available in a clear glass door
- Available in Stainless Steel (SS)

POWER

120V / 60Hz / 15A

VWCI5150GRSS

FEATURES

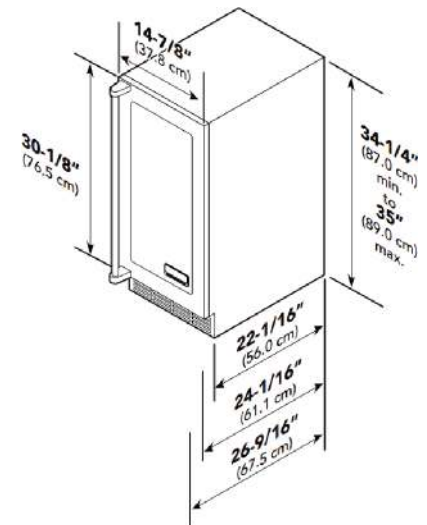

- Electronic controls with digital temperature readout
- Temperature can be adjusted from 44 to 68 degrees F (6.7-20 degrees C); factory set at 55 degrees F (12.8 degrees C)
- Can be displayed in either Fahrenheit or Celsius
- Five full extension wine shelves
- Accommodates 24 bottles (4 on bottom)
- Shelves can be removed and adjusted to store large bottles
- Dual pane and argon filled Low 'E' energy efficient glass doors
- LED display lighting

FINISH AND DESIGN OPTIONS

Available in clear glass door
Available in Stainless Steel (SS)

Maximum Amp Usage 3.0 amps

VCWB301RSS

FEATURES

TriTemp™ Storage System

TriTemp™ storage system provides three independent temperature zones to preserve wines at optimal serving temperatures.

Flexible Storage Options

Easily preserve up to 150 bottles that vary in size from standard, magnum and half size with our Flexible Storage Options.

Two Convertible Display Shelves

Flexible shelves adjust to your choice of display, allowing bottles to settle upon two convertible display shelves that are exclusive to our full-height cellars.

Low-Intensity Lighting

Dramatically display your wine collection in its best light with low-intensity interior lighting

UV-Resistant Tempered Glass

Shield your valuable collection from harmful light with UV-Resistant Tempered Glass.

High Temperature and Open-Door Alarms

When you're out, leave your wine and cares behind with our temperature and open-door alarms that can connect to your home security system.

FINISH OPTIONS

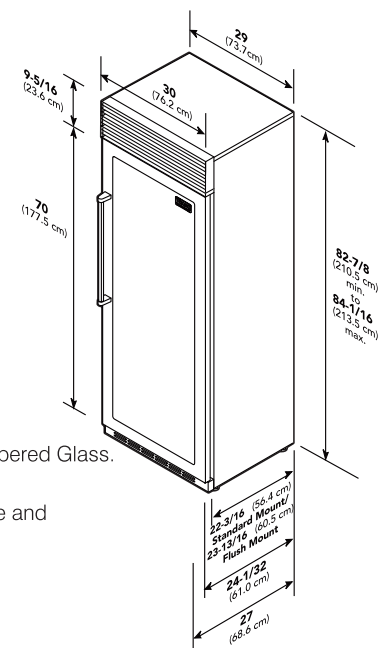

Available in a clear glass door

FDW102

FEATURES

Two Position Adjustable Upper Rack

Allows for loading of taller glasses in upper rack or larger pans in bottom rack.

Quiet Clean™ Performance Package

Three layers of insulation – bitumen, cotton and full side walls create one of the quietest dishwashers on the market.

Multi-Level Power Wash

Variable pressure and three wash arms ensure every dish is clean.

Allows for easy viewing of cycle/option selection and remaining wash time.

LCD Control Panel

Allows for easy viewing of cycle/option selection and remaining wash time.

DESCRIPTION

Water-Heating Element Rating 1240 watts

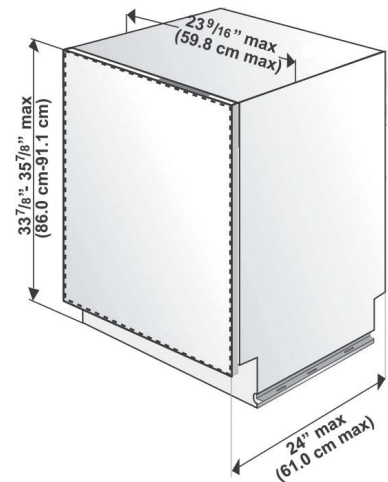

Inlet Water Temperature 120°F (49°C) required

Drain Hose 6.4' (1.9m) drain hose provided

Drain Hose High Loop Required Height from floor – 28" (71.0 cm)

FINISH COLOR

Stainless Steel (SS) / Custom panel

FDW102WS

FEATURES

Water Softener

Reduces water hardness to a manageable level to prevent glasses and dishes from etching.

LVS319B

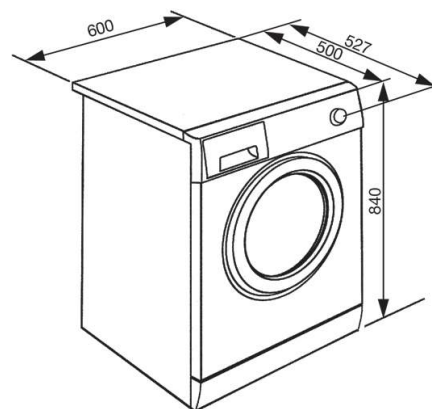

12 place settings
 Free-standing Dishwasher 60CM, White
 Noise level: 49 dB(A) re 1 pW
 Number of programmes: 5
 Washing temperatures: 38°, 50°, 65°, 70° C
 Energy consumption per cycle (kWh/ciclo): 1.01 kWh
 Water consumption per cycle (l/cycle): 12 l
 Annual energy consumption: 289 kWh
 Annual water consumption: 3360 l

WM127IN

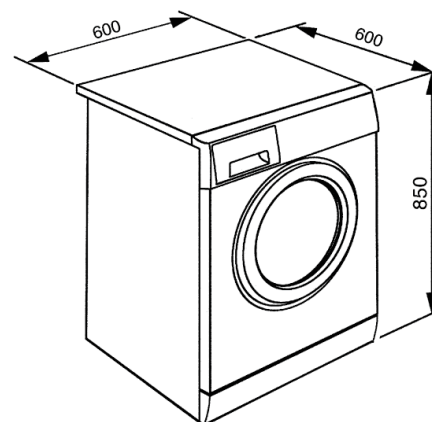

16 washing programs
 Washing capacity: 7 Kg
 Nominal power: 2200 W
 Total annual water consumption: 9460 L
 Noise level washing: 58 db(A) re 1 pw
 Noise level spinning: 75 db(A) re 1 pw
 Max spin speed 1200 rpm

LB107-1

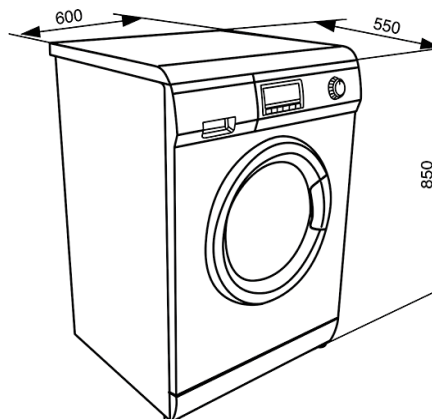

19 washing programs including
 easy iron, delay timer, half load
 Variable spin speed up to 1000 rpm
 Max 7 kg of dry laundry
 Water consumption: 49 litres
 Energy consumption: 1.33 kW/h
 Nominal power: 2.30 kw

WDF147

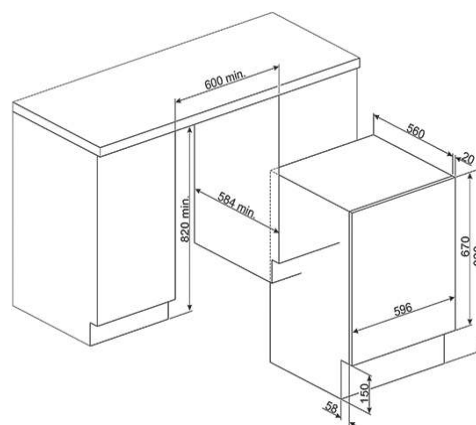

15 washing programs including
 Variable spin speed up to 1400 rpm
 Max washing capacity: 7kg dry laundry
 Max drying capacity: 4kg
 Consumption for washing only: water:
 47 litres, energy: 1.19kW/h
 Consumption for complete 7kg wash + 2 sessions
 of 4kg drying: Water 99 litres, energy: 4.76kW/h
 Annual energy consumption: 952 kWh
 Annual water consumption: 19800 litres
 Nominal power: 2.00kW

WDI14C7K

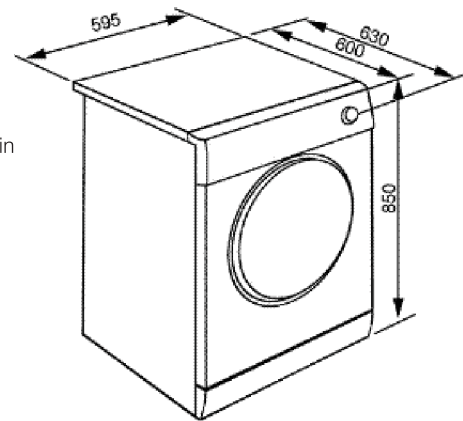

No. of programs: 15
 Wasing loading capacity: 7 Kg
 Drying loading capacity: 4 Kg
 Noise level washing: 56 dB(A) re 1pW
 Noise level spinning: 72 dB(A) re 1pW
 Noise level drying: 58 dB(A) re 1pW
 Energy consumption (washing + drying): 4.76 KWh
 Water consumption (washing+drying) per cycle: 99 litres
 Duration of the normative programme: 390 min

DR72IN

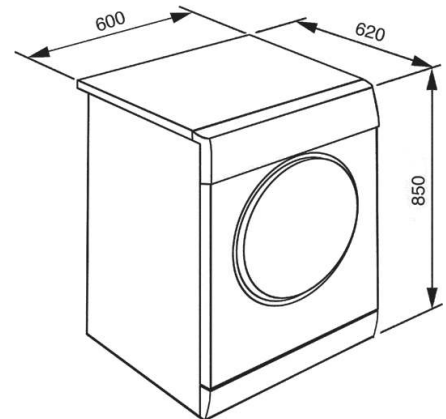

Number of programs: 16
 Special programs: Refresh, Business, Jeans, Quick 35 min
 Drum material: Stainless steel
 Load capacity (cotton): 7 kg
 Type of tumble dryer: Condenser
 Annual energy consumption: 504 Kwh
 Noise level for the standard cotton programme at full load: 65 dB(A) re 1 pw

DRY72C-1

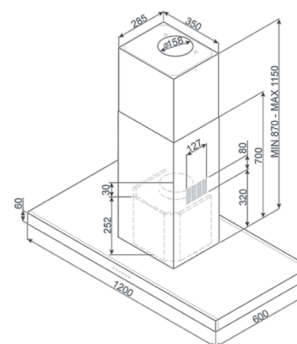

Max drying capacity: 7 kg
 St/steel drum
 Extra large 340 mm porthole
 Electronic controls
 For complete 7 kg, energy consumption: 3.92 kW/h
 Nominal power: 2.84 kW

KI120XE

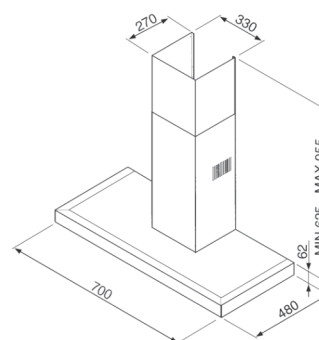

1 high performance motor: 275W
3 speeds, plus intensive
4 x 1W LED lights
4 aluminium grease filter
Nominal power 280W

KSE71X-1

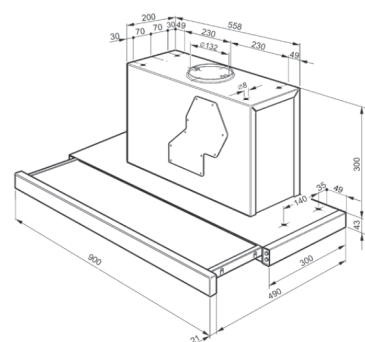

1 High performance motor: 115W
3 Speeds 2 Grease filters
2 x 20W halogen lights (front position)
Vent Outlet: Ø 150mm
Nominal Power: 155W

KSET910X

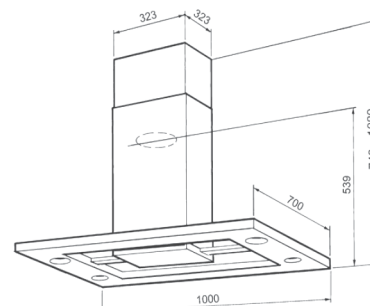

1 High performance motor: 300W
3 speeds
4 aluminium filters
3 x 20W halogen lights
Internal re-circulation possible
Vent outlet: Ø 120mm
Nominal power: 300W

KSIV960XE

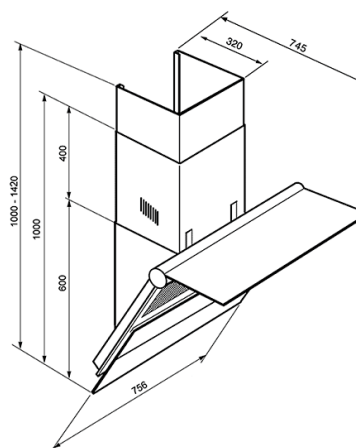

Motor power: 310 W
Free outlet maximum capacity: 715 m3 /h
3 speeds Intensive speed
Single st/steel grease filter
Vent outlet Ø 150 mm
Non return valve 4 led lamps (2 W)
Annual Efficiency Consumption (AEChood): 61.9 KWh/a

KTS75CE

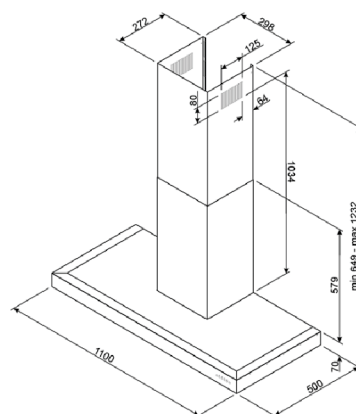

Motor power: 275 W
 Free outlet maximum capacity: 750 m³ /h
 3 speeds
 Single st/steel grease filter
 Vent outlet Ø 150 mm
 Non return valve 2 led lamps (1 W)
 Annual Efficiency Consumption (AEChood): 49.8 KWh/a

KS110BLE

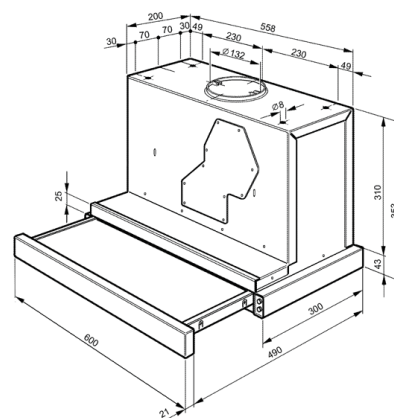

Motor power: 275 W
 Free outlet maximum capacity: 800 m³ /h
 3 speeds
 3 aluminium grease filters
 Vent outlet Ø 150 mm
 Non return valve 2 led lamps (1 W)
 Annual Efficiency Consumption (AEChood): 63.9 KWh/a

KSET610X_3

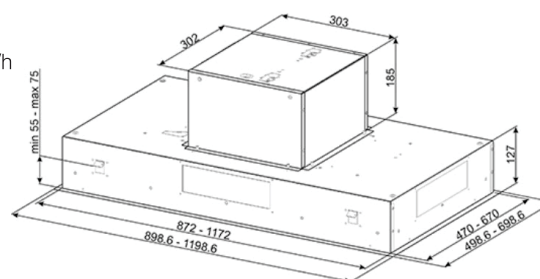

1 High performance motors, 240W
 3 speeds
 2 Aluminium filters
 2 Halogen lamps (2 x 20W)
 Internal re-circulation possible
 Vent outlet Ø 120mm
 Nominal power 280W
 Extraction rates:
 Ducted 380 m³/h
 Recirculated 340 m³/h

KSEG120XE

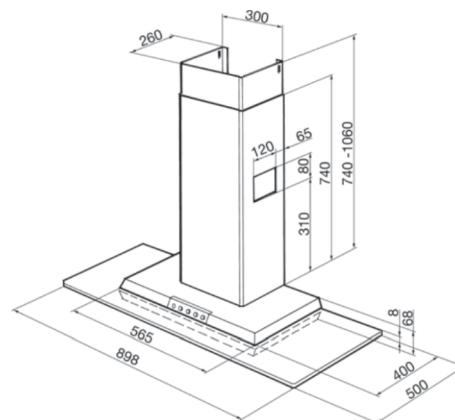

Motor power: 270 W
 Free outlet maximum capacity: 750 m³/h
 3 speeds
 4 aluminium grease filters
 Vent outlet Ø 150 mm
 Non return valve
 3 led lamps (1 W)
 Annual Efficiency Consumption (AEChood): 63.3 KWh/a

KSEV97X2

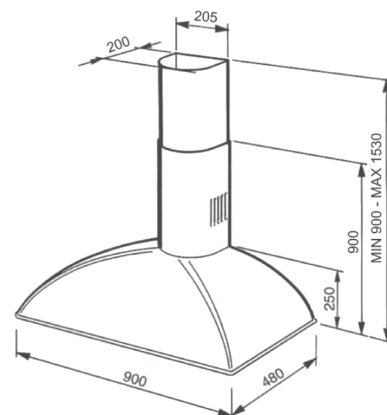

1 motor
3 speeds
Adjustable electronic slider 2 halogen lamps
Vent outlet Ø 150mm
Nominal power 370W
Extraction rate 870m³/h
Noise level at first speed 46 dB(A)

KS89PE

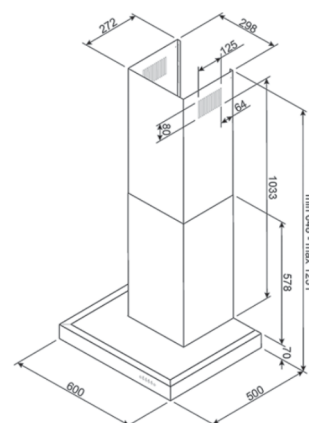

Motor power: 275 W
Free outlet maximum capacity: 820 m³ /h
3 speeds
3 st/steel grease filters
Vent outlet Ø 150 mm
Non return valve 2 led lamps (2 W)
Annual Efficiency Consumption (AEChood): 55.3 KWh/a

KS6500XE

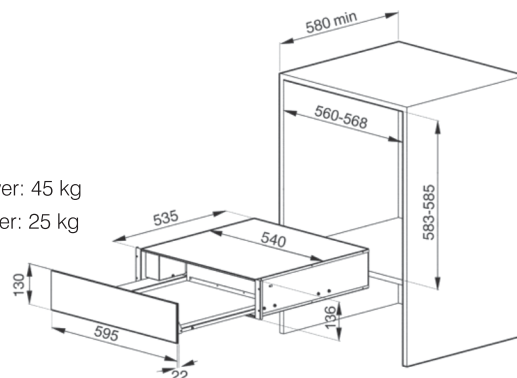

Motor power: 275 W
Free outlet maximum capacity: 800 m³ /h
3 speeds
2 aluminium grease filters
Vent outlet Ø 150 mm
Non return valve 2 led lamps (2 W)
Annual Efficiency Consumption (AEChood): 61.8 KWh/a

falmec

Falmec's fascinating history is typical of north-eastern Italian businesses: beginning from the intuition of its founders - Danilo and Maurizio Poser - and a specific market demand, it has transformed from a semi-artisan company to a real industrial leader, creating innovative products and designs, in which technological advances merge with the most sophisticated style.

Over 130 employees work in the manufacturing facilities, and our research and development office works every day to identify new technologies and new market segments; with a production of over 130,000 units per year, Falmec distributes its products worldwide, and its turnover is essentially balanced between the domestic market and exports. Today, Falmec is housed in a highly automated, 29,000 square metre production facility that was recently expanded. The company currently manufactures over 700 different versions of over 100 models. From processing steel to powder coating the insides, from sound absorbent chambers to the highest quality materials, today, Falmec cooker hoods represent the sector's industrial standard.

BLANCO

One of the world's leading providers of high quality kitchen sinks and faucets.

Family-owned since 1925, BLANCO's humble beginnings included making copper galvanized parts for cookers and hot water bottles with a team of 30 loyal employees. Today, we have produced more than 50 million BLANCO sinks, and are recognized as a world leader in quality, innovation and unsurpassed service.

Long gone are the times when a sink was merely used for function. These days, it can be the muse for a kitchen – or perhaps an entire home. Because of our dedication to quality, we ensure that all BLANCO sinks are inspected multiple times before earning the BLANCO name. It's just a part of our commitment to our craft and our customers.

BLANCO commits itself to respect ethical business principles and since 1994 has been a member of the Caux Round Table (CRT), an international network of principled business leaders and companies working to promote a moral capitalism.

The Best Technology for Water

SUNO

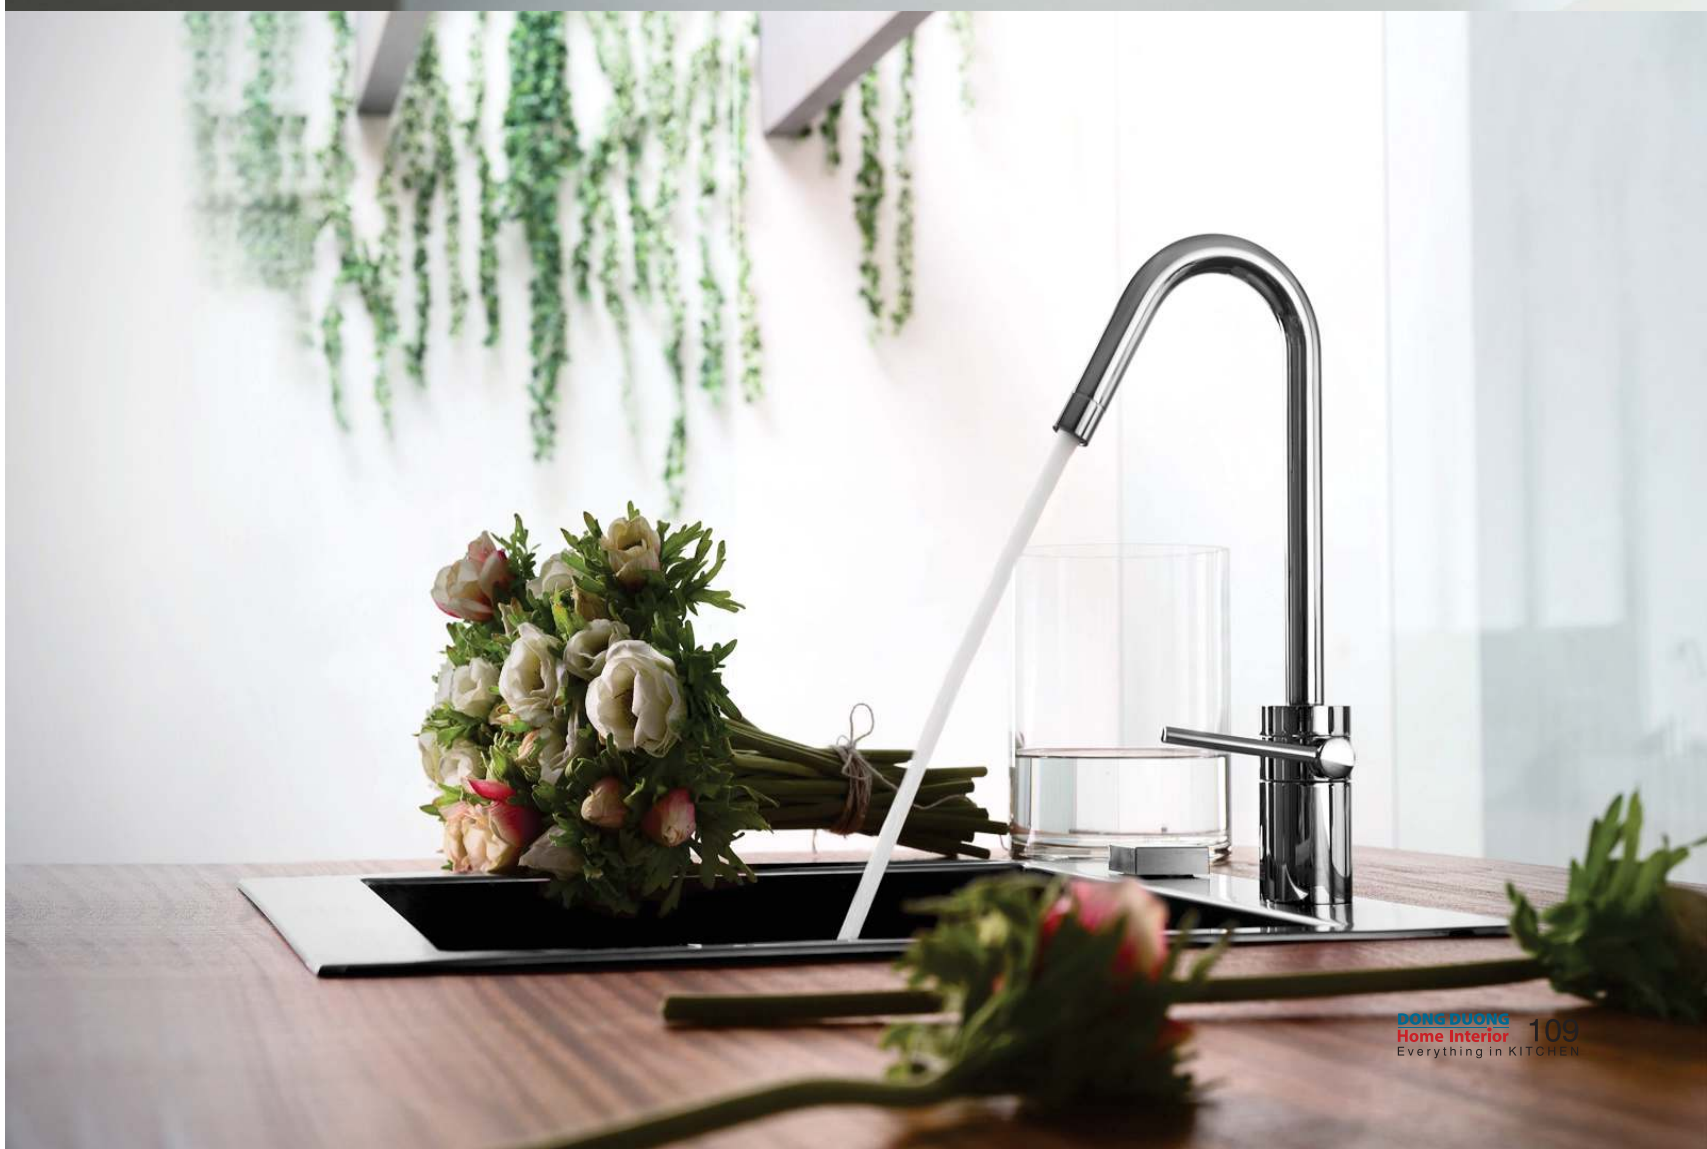

ECO-FRIENDLY FACTORY

Pure design and incomparable technological efficiency: we have been combining our immense historic patrimony with the power of innovation for over fifty years. Today, choosing the Nobili brand-name signifies recognising the true value of the one and only Made in Italy, unmistakable and synonymous of quality. One hundred thousand square metres of production space. Over three hundred indoor machining work centres.

Three eco-friendly galvanic plants and an unparalleled environmental protection programme. Because a product designed to improve quality of life cannot be born if it is destined to destroy the world in which we live. And rightly so. Maximum respect and minimum consumption: the Suno factory, heart, soul and headquarters of the Nobili Group, a true to life “eco-friendly factory”.

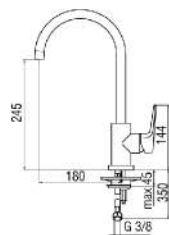

The only production centre of its kind in the sector with a high level of automation and an eco-sustainable production: the very latest development at the works are the 9 thousand plus roof-mounted photovoltaic modules, capable of producing clean energy and reducing the company's energy consumption.

Vibo spa was founded in 1980 in Northeast Italy, a region with a strong entrepreneurial spirit where the ability to risk and innovate is a factor that distinguishes the way of doing business in these lands and has always been a synonym of excellence in the history of Italian industrial development. And Vibo is a prime example of this.

The initial simple working of metal wire, mainly in an artisan manner, maintains firm links with the company's surroundings, while, by grasping the opportunities offered by market globalization, the company has become a leader in the furnishing subcontracting sector. A world of accessories in wire suitable for countless application areas: furnishing, contracting, retail.

Research into innovative solutions, the development of technologically more complex machining operations, and the use of other materials in addition to metal wire to enhance the product have led Vibo to produce accessories that meet new functional, aesthetic and quality demands in the Made in Italy style of high quality and productive specialization.

The continuously changing scenarios and the goal of differentiating the markets in order to grow even ore have led to significant recent investments, with the revolutionization of the production systems and broadening of the product range with new lines with coordinated aesthetics.

H 200 STANDARD

Basket H 200, concealed full extension slides with dampened return and right/left ABS side covers. Three-way adjustable door brackets PRCA02 available separately.

TECNOINOX[®]

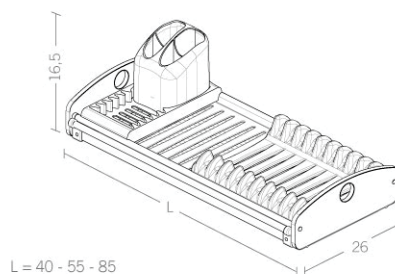

ARCO

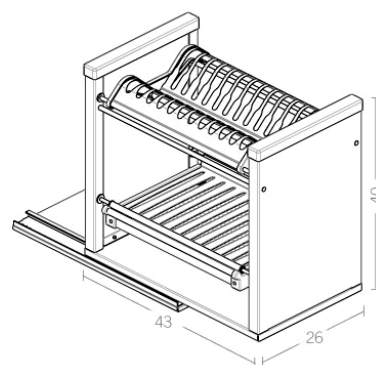

Arco can rest on worktops or shelves; designed in an attractive and ergonomic shape, it features steel and clear polycarbonate sides and separate cutlery stands and dish racks. Arco is entirely made in **AISI 304** stainless steel.

Arco is available in size 45/60/90 cm

ESTRAIBILE

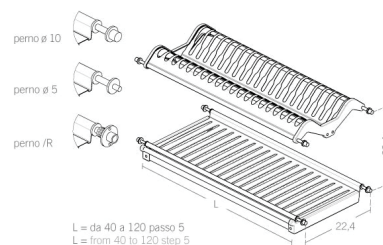

Removable dish rack for base, made completely of AISI 304 stainless steel, just like the Inoxmatic range of dish racks already assembled, to ensure stability for your dishes and a larger load. The rack can be extracted by means of very smooth glider rails, up to a **maximum of 30 kilos**.

INOXMATIC

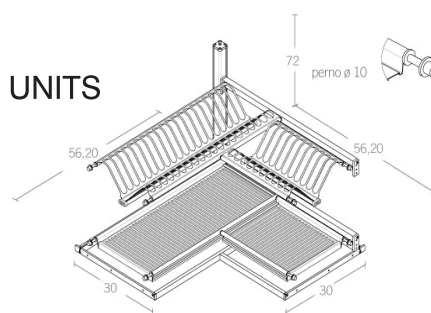

Inoxmatic, is a classic Tecnoinox draining board: classy, resilient and functional. It is easily fitted and looks great.

- Full-load dish-rack bending is reduced by 90%
- Exceptional dish stability
- 11% more stainless steel

INOXMATIC FOR CORNER UNITS

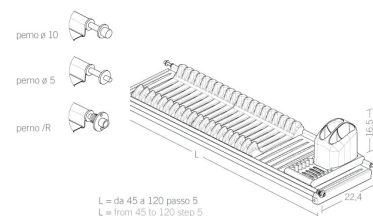

This model is particularly useful with low hanging units (min. 32cm), where a single grid can be commodated. The plastic parts are made in atoxic material and can be put in dishwasher. Modular 1 is available in lengths from 45 to 120 cm.

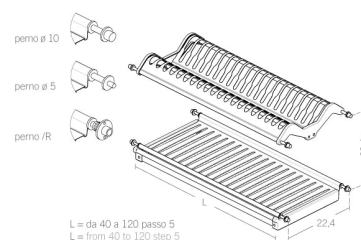

MODULAR 1

It is made according to customer's specifications as to size. Inoxmatic for corner units available in unit sizes 60x60 cm and 65x65 cm.

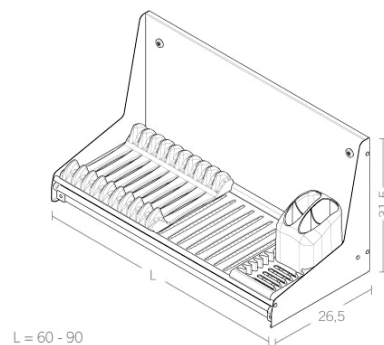

MODULAR 2

The plastic parts are made in atoxic material and can be put in dishwasher. Modular 2 is available in lengths from 45 to 90 cm.

OPEN

Entirely in AISI 304 stainless steel from the frame to the drainer, Open presents itself as an extremely original draining board. It can be personalised by fitting useful plastic fixtures, adjustable at will. Open is available in sizes 60 cm. and 90 cm.

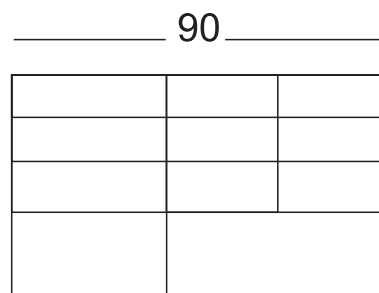

FINELINE

Cutlery racks dark oak wood - walnut

With a unique and characteristic look, the thinly-shaped dividers confer lightness and elegance to the whole kit. Fineline is made in two finishing, stainless steel/walnut and stainless steel/smoked oak.

Fineline cutlery insert is available for drawers sized 45 - 60 - 90 - 120 cm.

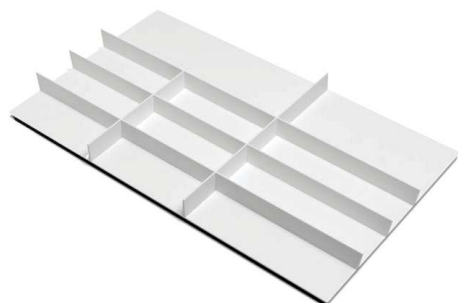

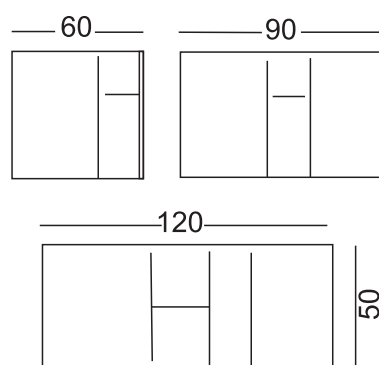

FINELINE

Pull out dark oak wood - walnut

With a unique and characteristic look, the thinly-shaped dividers confer lightness and elegance to the whole kit. Fineline is made in two finishing, stainless steel/walnut and stainless steel/smoked oak.

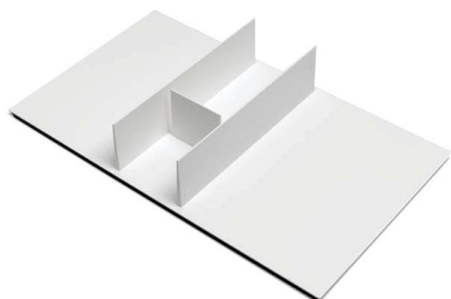

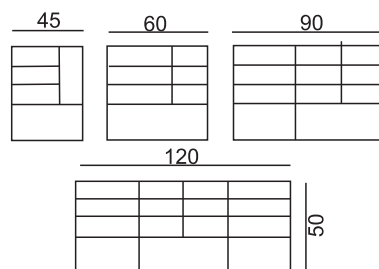

Fineline cutlery insert is available for drawers sized 45 - 60 - 90 - 120 cm.

FINELINE BIANCO

Cutlery racks acrylic white

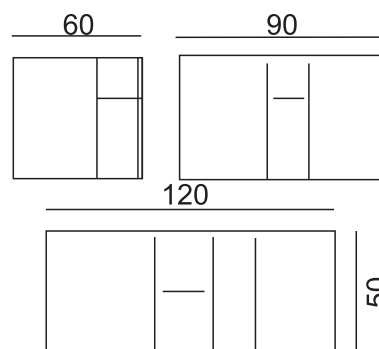

With its solid, non-porous surface, this material also has a number of distinguishing features: it is scratch and shock resistant, germ-free, and easy to clean, ensuring great durability of the colour and of the surface itself. Fineline cutlery insert acrylic white is available for drawers sized 45 - 60 - 90 - 120 cm.

Tecnorock cutlery insert is available for drawers sized 45 - 60 - 90 - 120 cm

DISH RACKS

The drawer system represents a revolutionary and brilliant way of reorganising space for cutlery and crockery in every kitchen drawer. Its innovation is that it is a single piece, ready to use so does not require fitting and it comes in a variety of combinations and sizes. Available for 45*or 50*cm deep and for 60*-90*-120*cm size drawers. *Sizes refer to nominal drawer measurements

DRAWER KIT WITH TUBS

The drawer kit with tubs has undergone a wholesale overhaul: new lids, new detergent bottle holding bins, standard fitted odour abatement filter, and bucket-holding base in a single piece of varnished aluminium.

The buckets are placed at the front for extra convenience of use; the rear part is fitted with tubs for storing bottles, detergents and other house-cleaning materials.

Available with bins 30, 26 and 22 cm high, drawers 60, 90, and 120 cm long and 45 or 50 cm deep.

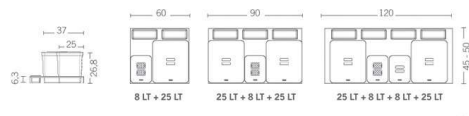

MAXIKIT

Maxikit is the ideal product for anyone needing large-capacity waste recycling units, 25 lt buckets with reduced height storage requirements (26 cm), and detergent bottle holders in the rear part for complete under-the-sink space management.

Featuring a varnished aluminium bucket-holding base, Maxikit combines stylishness and convenience of use.

Available with bins 26cm high, drawers 60, 90, and 120 cm long and 50 cm deep.

AL 100

100% aluminium. Cutting down to the bare essential one's use of plastic components, we have devised AL100, a product that stands out for its classy materials and practical use of available space.

Main features:

- Bins and structure made in smudge-free polyester-painted aluminium
- Large capacity bins
- Bin liner frame
- Odor-free filter for organic waste collection

AL 100 AUTOMATIC

100% aluminium. Cutting down to the bare essential one's use of plastic components, we have devised AL100, a product that stands out for its classy materials and practical use of available space. Opening the cabinet door (thanks to the patented mechanism) the lid covering the bins will lift and one can access the large containers for waste recycling. Closing the door, instead, the lid will bring down on the edge of the bins, and the special gasket under the lid will stop any unpleasant smell from wafting.

Main features :

- Exclusive lid opening/closing mechanism
- Bins and structure made in smudge-free polyester-painted aluminium
- Large-capacity bins
- Bin liner frame

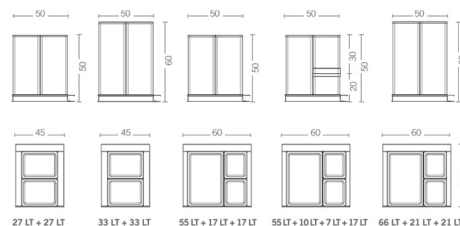

P-ONE

P-ONE is the solution presented by Tecnoinox for a door-fitted dustbin. Thanks to the patented mechanism, opening the kitchen unit door deftly lifts the dustbin lid, ensuring easy access to the large containers for separated waste disposal. Shutting the door will close the lid flush with the bin rim, while the special gasket under the lid will seal any bad smells inside.

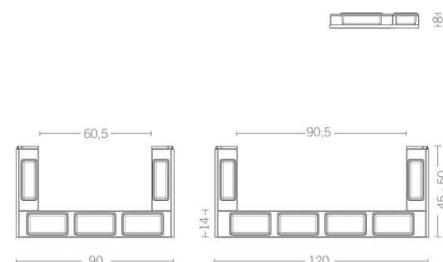

Main product features:

- Exclusive bin closing system
- Metal bins
- Very large capacity range (from 54 to 108 litres)
- Waste bag frame
- Bin size compatible with standard waste bag sizes available
- System compatible with all the main types of drawer
- Speedy and problem-free installation and adjustment
- No wobbling or warping of the door

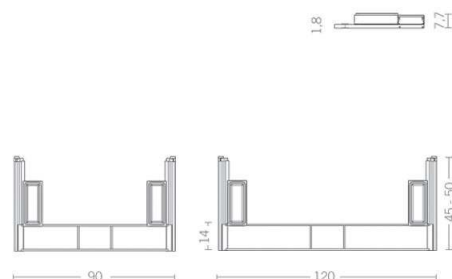

UNDER-SINK KIT

Kit to help you organise the area under your sink. The ideal solution for you when you are trying to sort out all those sponges and detergent bottles, and to make the most of the area around your sink. Made of varnished aluminium, it also contains holdall trays and can be quickly and easily adapted to the drawer. Available in size 90 and 120 cm and 45 or 50 cm deep.

UNDER-SINK ALL IN FRONT

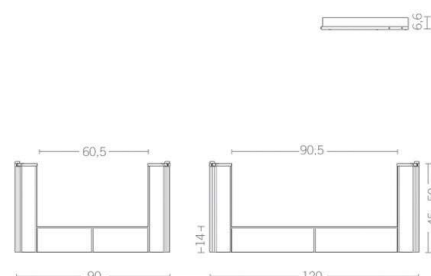

Sottovasca All In Vario has been designed for utmost flexibility of use. It is especially handy when the basins are very deep, or are mounted slightly off-centre against the base of the sink. The structure is mounted on an aluminum frame that fits directly into the drawer sides keeping it firm, without having to use the melamine panel underneath. Available in size 90 and 120 cm and 45 or 50 cm deep.

UNDER-SINK ALL IN P08

All in P08 is one of the classiest bathroom accessories from the new range of products for furnishing one's sink. It is made with an aluminium frame and dividers, offering maximum capacity combined with an impressive visual and aesthetic effect.

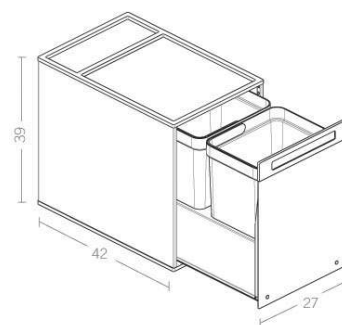

The structure, completely in aluminum, fits directly into the side walls of the tray, while keeping it firm, without having to use the melamine panel underneath. Available in size 90 and 120 cm and 45 or 50 cm deep.

BOX 1 BOX 2

The Box series stands at the top of the Tecnoinox range in the field of separate waste disposal. Entirely made in 18/8 stainless steel AISI 304, the great advantage of the Box series is its airtightness, eliminating the problem of bad smells. The bins slide comfortably on runners fixed to the base and retract automatically. The upper part is also a practical work top, where sponges, gloves, bags and detergent can rest.

HIGHLINE 1 HIGHT 2

The Highline series represents, in the field of built-in waste recycling systems, the top-quality item in the Tecnoinox product range. Having its exterior housing entirely made in AISI 304 stainless steel, the Highline series offer a full tightness. In fact it is completely closed and for this reason it prevents bad smell emissions. The containers slide on a new concept carriage which guarantees high stability. The carriage is supported by fully extractable sliding guides which have a soft-closing device. The device has been tested and guaranteed for up to 60.000 opening cycles.
